ADACTIN SOFTWARE TRAINING TESTIMONIAL

THE ROADMAP OF GETTING INTO THE IT FIELD

M.P

MANISH PURI

TEST ANALYST

ADACTIN PEOPLE

01 BACKGROUND INFORMATION

A career in IT is one of the most sorted after both globally and here in Australia. It was this pursuit that brought Manish Puri, a Senior Test Analyst from India to Australia. However, the journey was not easy, to say the least.

Despite having overseas manual testing experience, his lack of local industry exposure and a career gap found him struggling to land a role.

02 A NEW JOURNEY BEGINS

Manish heard of Adactin from a Facebook group when he saw a post about the Selenium course. An "aha" moment caught him and he realised this was a perfect opportunity to upskill.

He thereafter enrolled in the popular Selenium with Java Program. Ultimately, what led Manish to decide with Adactin was the quick turnaround of the course and value for the competitive price.

03 JOURNEY CONTINUES
AUTOMATION TRAINEESHIP PROGRAM

With the automation skillset and certification under his belt, the natural step forward is to prepare yourself for the workforce. This was when Manish enrolled for the second step at Adactin the popular 2-month Traineeship Program.

"While we learned the theories in the course, the best learning was when we applied our learning towards projects in the traineeship program", Manish said. He further added that not only were the projects interesting and challenging, but they were also a crucial part of his learning and growth.

Daily interactions with key stakeholders and guidance from top management like the CEO and COO were some of the highlights of his experience.

04 A NEW CHAPTER WITH A NEW JOB

While Manish reached out to Adactin with the initial intention to upskill, but out of his sheer determination and hard work, he managed to land himself a full-time position as a Test Analyst in Adactin. He remarked that he will forever be grateful for all the support and opportunity provided by the entire Adactin family.

He continued to address that for anyone considering a career in IT, he highly recommends enrolling into practical technical courses like the traineeship program in Adactin. The program offers a dynamic learning avenue incorporating hands-on project exposure, technical skills, soft skills grooming and so on.

Finally, and most importantly to make the most of the opportunity to not only develop your IT skills but also grow as a person.
